- Health & Safety Management Systems
- Active Safety Management System (ASMS)
- Search & Rescue and Emergency Response Cooperation Plans

Aquamarine Power is a marine renewable energy company who are developing a diverse marine energy product portfolio.

Their leading product Oyster®, is to be demonstrated in 2009 at the European Marine Energy Centre (EMEC) off the coast of the Orkney Islands in 2009. Oyster® is a hydro-electric Wave Energy Converter, designed to convert renewable energy harnessed from ocean waves into usable electricity.

PMSS have been retained by Aquamarine Power since 2008 to provide comprehensive Health & Safety advice and CDM Coordination for their projects.
