## FALCK RENEWABLES

Falck Renewables currently have 6 wind farms in the UK with a capacity of 231 MW either operating or in construction.

PMSS were commissioned initially by Falck Renewables to carry out a complete review and gap analysis of their Health & Safety procedures.

As a result, PMSS prepared and implemented a fully up-dated Health & Safety Management System (HSMS) to comply with all applicable legislation and current industry best practice.

Additional services provided included specialist Health & Safety training for directors, managers and staff, Site Inspections & Audits and other ad-hoc advice as required.
