Directing safely

Overview

'Directing safely' is designed to ensure that health and safety is appreciated by people at the most senior levels.

Aims

The course aims to provide directors/ senior management with an understanding of the moral, legal and business case for proactive health and safety management and to give guidance on effective risk management.

The course aims to provide understanding of:

- the HSE's 'Successful health and safety management' (HSG65)
- the Turnbull Report ('Internal controls: guidance for directors on the Combined Code')
- the DETR/HSC's 'Revitalising health and safety' strategy statement
- the liabilities of directors and board members under health & safety and criminal law (including Manslaughter and Corporate Homicide Act 2007)

Learning objectives

On successful completion of the course, delegates should be able to:

- Understand the importance of strategic health and safety management and its integration into other business management systems
- Understand directors' and employees' statutory duties
- Identify accident causes and plan for prevention through hazard identification, risk assessment and control strategies
- Appreciate the consequences of failing to manage health and safety effectively
- Understand the importance of employee selection and the effect of human factors on health and safety
- Recognise the importance of consultation and communication with employees on health and safety issues
- Appreciate the significance of performance monitoring for continual improvement of health and safety management.
