- Insurers' Engineer
- Technical Advisors
- Construction Monitoring
- Progress Reporting
- Vessel Audits & Inspections

Lynn & Inner Dowsing are two adjacent Crown Estate Round 1 projects, owned by Centrica, which are being built 5km off the Lincolnshire coast, east of Skegness. Each of the two wind farms consists of 27 x Siemens SWT-3.6 MW WTGs.

PMSS were commissioned by GCube Insurance (WindPro) to provide Engineering and Technical Advice in support of their role as Construction Insurers to Centrica.

Subject to weather conditions during construction, it is expected both wind farms will be fully operational by the end of 2008.
