

PMSS Environmental Policy Statement

PMSS is a consultancy which strives for excellence in all of its business endeavours and is a world leader in providing project support in the renewable energy sector. One of PMSS's purposes as a company is to contribute towards a sustainable global environment.

PMSS is committed to continual improvement in environmental performance through the management of significant environmental impacts and compliance with all relevant legislative and other requirements. All employees have a responsibility to consider the environmental impacts of their work activities.

We will achieve this by:

1. Adhering to all procedures and controls set as part of the Environmental Management System to prevent pollution and other significant environmental impacts.
2. Communication with all staff and subcontractors to promote awareness and compliance with the Environmental Management System.
3. Regular reappraisal of the legal context of our company activities, products and services.
4. Regular, structured audit and management review of environmental performance and the effectiveness of the processes in place.
5. Setting challenging objectives and targets to drive improvement of environmental performance.
6. Appropriate training of all staff.
7. Appropriate allocation of resources to ensure that all requirements of the Environmental Management System can be met.
