October 2007 – ongoing

**Value:**  
£7 m (approx)

### PMSS disciplines:

- Project Management
- Construction Management
- Employers Representative
- Tendering & Contract Specifications
- Procurement Management
- Electrical Engineering
- CDM Coordination

The Westmill Wind Farm project will be the first wind farm in the South East of England and the first 100% community owned scheme in the UK. The project was developed by Energy4All, the UK's leading expert in community owned Wind Energy schemes.

The project comprises five Siemens 1.3MW turbines with tip heights of 81m and erected in a straight line across the old airfield near Watchfield, South Oxfordshire.

PMSS have been appointed by Westmill Wind Farm Co-operative Ltd as Project & Construction Managers and to act as Employers Representative under the FIDIC style contract.

The scope of work has included tendering and contract negotiation for wind turbine supply and installation with Siemens plc, the balance of plant contract with Econnect Construction Ltd and management of the Grid Connection agreement with Scottish & Southern Energy.
